SUMMARY

Software development student focused on backend and full-stack engineering, with project experience in Spring Boot microservices, React, REST APIs, JWT authentication, Stripe payments, MongoDB, Android, and iOS development.

EDUCATION

George Brown College **Expected 2026**
Advanced Diploma, Computer Programming and Analysis *Toronto, ON*

- Relevant focus: backend development, REST APIs, databases, Android/iOS development, Agile delivery, and full-stack capstone implementation.

TECHNICAL SKILLS

- **Languages:** Java, C#, Python, SQL, JavaScript, HTML/CSS, Kotlin, Swift
- **Frameworks & APIs:** Spring Boot, React, ASP.NET Core, FastAPI, REST APIs, JWT, Stripe, SwiftUI, SwiftData
- **Databases & Tools:** MySQL, PostgreSQL, MongoDB, Git, Docker, Visual Paradigm, Android Studio, Xcode, Office 365
- **Methods:** Agile Development, Unit Testing, Debugging, Backend Architecture, Neural Model Experimentation in Python

PROJECT EXPERIENCE

Farmer Marketplace & Food Redistribution Platform **2025 - 2026**
Full-Stack Developer, Capstone Project *George Brown College*

- Built a full-stack marketplace connecting farmers, customers, restaurants, and NGOs for local product sales and surplus food redistribution.
- Worked on over 5 of 12 microservices and implemented Stripe payments, JWT role-based authentication, registration/login, profile management, admin panel features, user settings, and database integration.
- **Stack:** React, Java, Spring Boot, REST APIs, JWT, Stripe, Microservices, MongoDB

Before You Go **2025**
iOS Developer, Swift Mobile App *Academic Project*

- Developed location-based reminder workflows that connect saved places with item checklists and trigger notifications when users leave geofenced areas.
- Contributed item management, notification logic, SwiftData persistence, and the end-to-end reminder experience.
- **Stack:** Swift, SwiftUI, SwiftData, Geofencing, Notifications

Canada Tour Guide App **2025**
Android / Backend Developer *Academic Project*

- Built Android and backend functionality for a landmark recognition app using photos, OpenAI, and Wikipedia data to generate personalized audio-ready stories.
- Implemented the main screen, settings screen, persistent SharedPreferences settings, and backend integration for generated content.
- **Stack:** Kotlin, Android Studio, Python, FastAPI, OpenAI, Wikipedia API

PROFESSIONAL EXPERIENCE

B&B Partners **Dec. 2023 - Jun. 2024**
Intern Assistant Developer *Remote*

- Developed and debugged 15+ web features and backend fixes, improving application load time by 20%.
- Optimized database queries, reducing execution time by 30%, and resolved 10+ critical backend issues.
- Implemented unit tests covering 90% of backend functionality and collaborated with a 5-developer Agile team.

ADDITIONAL EXPERIENCE

McDonald's, Crew Member **Nov. 2024 - Feb. 2025**

- Delivered customer service to 30+ customers daily, handled cash transactions accurately, and maintained food safety standards in a fast-paced team environment.

Rooks to Cooks, Volunteer **Jul. 2024 - Aug. 2024**

- Supervised children during cooking sessions, helped prepare 30+ meals, maintained kitchen organization, and coordinated with staff to improve session flow.
